Paving Block

ACCESSORIES

Spacer

This is a plastic accessory for 10mm joints ideal to manufacture prefabricated panels.

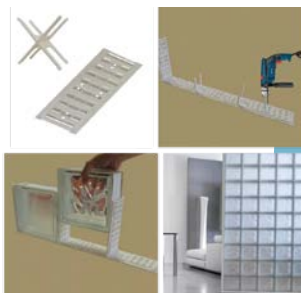

Openable Frame

Designed to ventilate rooms, the openable frame is a white press formed sheet that can house 1 or 4 squared blocks.

VitraLOCK

is dry installation for building walls and constructions from glass blocks. This installation system is defined just by two plastic pieces, a spacer and a connector, which makes it very simple and easy to use. The connector can be "locked" into spacer; continuing this process a plastic grid is formed eventually.

QUICKTECH SYSTEM

The Quicktech System allows the combination of the Basic line shapes: squared, rectangular, and end blocks. The internal joints are of 5mm thickness and the external vertical joints are 15mm thickness. The walls finishing can be made with mortar (for straight and curved walls) or with silicon (only for straight walls).

Easy to Install

Glass PILLARS Polished

Glass Pillars are being used as decorative pillar in homes, halls, cafes, lounges, clubs etc. You can put it outdoors in garden parties with colorful lights to jazz it up. A colored LED light when placed on top or bottom of the pillar lights up the bubbles in the pillar with the color of the light making it even more amazing to look at.
